TITLE: AWNING SUPPORTED ON ROOF PANEL FOR USE OUTDOORS

10/649,814

FIELD OF THE INVENTION:

05 The present invention relates to an awning supported on roof panel for use outdoors, ^{and} ~~an~~ more particularly to an awning for use ← outdoors that may be easily detachably connected to a roof panel of an automobile to provide a shade for people during outdoor activities, such as camping and the like.

10

BACKGROUND OF THE INVENTION:

It has become a popular way among people to enjoy weekends, holidays, and vacations by driving to the countryside for outdoors
15 leisure activities, such as sightseeing, fishing, camping, and going to some resorts. A problem with such outdoors activities in summertime is there are not always shady places available for taking a rest. It is therefore desirable to have a car equipped with sun-blocking means.

20

There are currently many awnings for use outdoors available for mounting on a roof panel of an automobile. However, various kinds of tools and fastening means are needed to first fix four sets of locating means to outer edges of the roof panel, such as drip
25 moldings. Thereafter, the heavy awning is screwed to the four sets of locating means before it can be extended to block sunshine. It is apparently complicate and troublesome to mount the conventional
